Season 02 – Week 03

Problem Statement

Alex seeks a comprehensive introduction to UiPath, an automation platform that has piqued his interest. To assist him, a bot must be created to generate a succinct yet informative section within a Word document that outlines the essence of UiPath.

You have to create an automation that:

1. Navigates to https://en.wikipedia.org/wiki/UiPath

2. Copy the introduction passage alone.

3. Paste the passage in a word file and save it.

Ensure the automation provides the correct and complete data, so that Alex gets the clear introduction about Uipath.

Sample Word Output:

UiPath is a global software company that makes robotic process automation (RPA) software. It was founded in Bucharest, Romania, by Daniel Dines and Marius Tîrcă. Its headquarters are in New York City. The company's software monitors user activity to automate repetitive front and back office tasks, including those performed using other business software such as customer relationship management or enterprise resource planning (ERP) software.
